EDUCATION

Dit University   Dehradun , India
*Bachelor in Computer Science **7.94 GPA***   *Sept. 2021 – May 2025*

The Cambrian School   Faizabad , India
*Senior High School in PCMC's : **75.6 Percentage***   *Aug. 2019 – May 2020*

The Cambrian School   Faizabad , India
*Junior High School in PCMC's : **80.6 Percentage***   *Aug. 2017 – May 2018*

EXPERIENCE

FullStack , DevOps Intern   May 2024 – July 2024
KODERS   *Dehradun IT Park , India*
- Created frontend and Integrate **Open AI** model **FFmpeg** and **Whisper AI** with **Next.js** .
- In backend Adding **Authentication** and **Authorization** Integrating **S3 bucket** improved video upload & processing speed by 30%.
- **Optimized Reliability with AWS and Docker** Lead to 40% improvement in deploying efficiency
- Developed Koders Merch BackEnd using **Strapi Framework**
- Contributon in building Expense tracker backend in **Node.js**, deployed on **AWS EC2** with web server **NGNIX**

PROJECTS

Lingua Cloud Sphere — <u>Link</u> | *Python, AWS, React, ChakraUI, Docker, API Gateway*   May 2024 – June 2024
- Executed the implementation of a robust AI-driven **NLP platform** leveraging **AWS services**, achieving a **30% decrease in operational costs**
- Built a responsive front-end using **Chakra UI** and React.js, coupled with a **serverless Python back-end**. Utilized **AWS API Gateway** and **S3** to maintain **99.9%** availability and uptime
- Implemented **Agile** methodology, leveraging **Trello Kanban** boards for project tracking, resulting in a 20% increase in team efficiency
- **GitHub** : https://github.com/SHOEB091/Lingua$_C$loud$_S$phere.git

Url Shortener — <u>Link</u> | *JavaScript, Node.js, Express, Jwt, Ejs, MongoDB*   Feb 2024 – Feb 2024
- This Project helps in short lengthy url reduce time to search / type
- **Node.js** with **EJS** for dynamic content, MongoDB for dataStorage URLshortening, user authentication (**JWT, sessions**) , and URL management
- Used **Docker** to **Containerized** the application pushed to Docker hub and then image deployment on **koyeb**
- **GitHub** : https://github.com/SHOEB091/url-shortening.git

Mern Blog — <u>Link</u> | *React.js, Node.js, Express, Jwt, TailwindCss, MongoDB, FireBase*   March 2024 – April 2024
- Personalize blog application with light and dark theme modern ui and Admin pannel
- Implemented a robust backend architecture using **Node.js** and **Express.js** that streamlined data retrieval processes, resulting in a **40% reduction in server response** time and improved overall application performance for users.
- **JWT** and **bcryptjs** for secure **login, sessions** with cookies , **simple firebase storage** for storing blog images , light/dark mode
- **GitHub** : https://github.com/SHOEB091/mern-blog

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, HTML, CSS, Solidity
Tech Stack: MERN Stack , WEB 3.0 , DevOps , CyberSecurity
Frameworks: React,Next.js, Node.js, Express.js, Rest API's
Developer Tools: Git/Github, Docker , Kubernetese, Postman, VS Code, PyCharm, IntelliJ, Eclipse
Cloud Platforms: Amazon Web Services , Google Cloud

ACHIEVEMENTS — <u>LINK</u>

Certificate's: AWS Cloud Technical Essential, Containers w/Docker, Kubernetes, Cryptographhy, Blockchain
